

SAMUEL GOH JUN JE

Graduate Software Developer | Full-Stack & Mobile |
React Native, Next.js, Node.js, Python | BSc Computer
Science & Mathematics | 3 Projects | Agile & GitHub

Graduate Software Developer with hands-on experience in full-stack web application development, specializing in JavaScript-based technologies including React, Next.js, Node.js, Express, and MongoDB, alongside Python and Flask. Skilled in implementing UI/UX designs into clean, responsive interfaces, building secure RESTful APIs, and deploying scalable, production-ready applications. Successfully completed two full-stack web applications and one systems-level project, including a lead management dashboard, a blog platform, and a Unix shell implementation. Experienced in Agile workflows, GitHub collaboration, and end-to-end project development, with strong problem-solving and analytical skills. Holds a BSc in Computer Science and Mathematics from the University of Manchester, delivering clean, maintainable code and contributing effectively in team-based projects.

PROFESSIONAL EXPERIENCE

React Native Developer | Pomelo

Aug 2024 – Oct 2024 | Manchester, UK

- Developed reusable mobile UI components and interface patterns using TypeScript in React Native, improving consistency and user interaction across the app.
- Collaborated with designers and engineers to refine screens, resolve UI issues, and manage pull requests using GitHub in a sprint-based Agile environment.
- Ensured smooth integration of frontend components with backend APIs, maintaining code quality and scalability.

KEY PROJECTS

Lead Management App | [Demo](#) | [Source Code](#)

Next.js | React | Node.js | Express | MongoDB

- Built a JavaScript-based full-stack lead management dashboard using React and Next.js with real-time UI updates and state-driven components.
- Developed a Node.js and Express REST API supporting secure CRUD operations and MongoDB Atlas data persistence.
- Deployed production environments on Vercel and Render, configuring environment variables, CORS policies, and secure backend communication.

BlogNest | [Source Code](#)

Flask | PostgreSQL | SQLAlchemy | Bootstrap

- Developed a full-stack web application with secure user authentication, role-based access, and RESTful routing.
- Integrated a PostgreSQL database using SQLAlchemy and implemented reusable UI components with Bootstrap and Jinja2 templating.
- Delivered a responsive, user-friendly interface focused on maintainability and clean separation of concerns.

Unix Shell | [Source Code](#)

Python | Unix | Operating Systems

- Built a Unix shell implementing command parsing, process management, pipelines, I/O redirection, and persistent command history.
- Applied core operating systems concepts including file descriptors, environment variables, and inter-process communication to manage processes efficiently.

INDUSTRY EXPERTISE

- Full-Stack Web Development:** Experienced in building scalable, responsive web applications using Next.js, Node.js, Express, Flask, and integrating MongoDB/PostgreSQL databases.
- Mobile Application Development:** Proficient in developing React Native apps with reusable UI components, TypeScript, and smooth user interaction flows.
- Software Engineering Practices:** Skilled in Agile/Scrum workflows, Git/GitHub version control, and collaborative development in team-based projects.
- Programming & Automation:** Strong foundation in Python, JavaScript, TypeScript, SQL, HTML5, CSS, and automation scripting.
- Project Implementation & Deployment:** Hands-on experience in deploying apps on Vercel, Render, handling environment variables, CORS, and secure API communication.

EDUCATIONAL BACKGROUND

University of Manchester — BSc Computer Science and Mathematics | Second Upper Class Honours

- Sept 2022 – June 2025 | Manchester, UK

CERTIFICATIONS

100 Days of Code: The Complete Python Pro Bootcamp — Udemy | June 2025 – Sept 2025

- Developed 100+ real-world projects including games, APIs, automation tools, data visualizations, and web apps.
- Covered Python scripting, automation, web scraping (BeautifulSoup, Selenium), data analysis (Pandas, NumPy, Matplotlib), and web development (Flask, Bootstrap, SQL).

LANGUAGES

- English (Native)
- Mandarin (Native)
- Malay (Basic)

EXTRA-CURRICULAR ACTIVITIES

- Competed in university hackathons (Hack-A-Bot, Student Hack)
- ABRSM Grade 8 Piano (Practical & Theory)
- Represented University of Manchester in Table Tennis

TECHNICAL SKILLS

- Programming Languages:** Python, JavaScript, TypeScript, Java, SQL, HTML5, CSS
- Frameworks/Libraries:** ReactJS, React Native, NextJS, NodeJS, Express, Flask, Bootstrap5, Tailwind CSS, Expo, Jinja2
- Databases:** MongoDB, MySQL, PostgreSQL
- Tools & Platforms:** Git, GitHub, VS Code, Postman, AWS, Vercel, Render, Jupyter
- Other:** Agile/Scrum workflow, RESTful APIs, Mobile UI Development, Responsive Web Design

KEY ACCOMPLISHMENTS

- Successfully developed two full-stack web applications and one systems-level project: **Lead Management App** (Next.js/Node.js/MongoDB), **BlogNest** (Flask/PostgreSQL), and a **Unix Shell** (Python / OS concepts).
- Built and deployed JavaScript-based full-stack applications, implementing secure **RESTful APIs**, frontend-backend integration, and MongoDB data persistence.
- Built reusable UI components in **React Native** using TypeScript, improving app consistency and user interaction across the Pomelo mobile app.
- Gained hands-on experience in Agile workflows and collaborative development using **GitHub** for version control and pull request management.
- Deployed apps on Vercel and Render with environment setup, CORS, and secure backend communication.
- Completed **100 Days of Code**: Python Pro Bootcamp, developing 100+ real-world projects covering automation, web development, data analysis, and web scraping.
